DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: Species A - Figures 1A-2B

- Species B – Figures 3A-4B
- Species C – Figures 5A-9
- Species D – Figures 10A-11B
- Species E – Figures 12A-14
- Species F – Figures 15A-18
- Species G – Figures 19-20
- Species H – Figures 21A-22B
- Species I – Figures 23A-24B
- Species J – Figures 25A-26B
- Species K – Figures 27A-28B
- Species L – Figures 29A-30B
- Species M – Figures 31A-35
- Species N – Figures 36A-37B

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- Claim 2 - Species A
- Claim 3 – Species B
- Claim 4 – Species C, D, E, F, G, H, I, J, K, L, M, N
- Claim 6 – Species H, I, J, K, L
- Claim 7 – Species H, I, J, K, L
- Claim 11 – Species F, H, I, J, M, N
- Claim 12 – Species C, E, F, M

The following claim(s) are generic: claims 1, 5, and 8-10.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: the common

technical feature in all the species is the adsorption heat exchanger having adsorption action and regeneration action created by a refrigeration circuit. This element cannot be a special technical feature under PCT rule 13.2 because the element can be found in prior art. US Publication 2001/0049943 teaches an air conditioning system containing a refrigerant cycle (illustrated in figure 2) wherein there exist an adsorption action of an adsorption heat exchanger (230, see paragraph 74 lines 1-6), a regeneration action of the adsorption heat exchanger (see paragraph 79, lines 10-13), and a condenser (232) substantially as claimed in claim 1.

3. A telephone call was made to D. Richard Anderson on September 26, 2008 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
